

ABHIMANYU N

Senior Software Engineer

Bangalore, India

+91 7845984290 • abhimanyu.n14@gmail.com • linkedin.com/in/abhimanyu-n • github.com/Abhimanyu14

PROFESSIONAL SUMMARY

Senior Android Engineer specializing in Kotlin and Jetpack Compose, building and scaling high-impact mobile features for large-scale consumer apps in payments (FinTech) and E-commerce. Strong track record in platform modernization, performance optimization, and backend-driven UI at scale. Active open-source contributor, Android technical writer, and Stack Overflow contributor.

SKILLS

Primary

- Languages: Kotlin, Java
- Android: Jetpack Compose, XML, Android SDK, Coroutines, Flow.
- Architecture: Clean Architecture, MVVM, MVP, Multi-module.
- Platform & Practices: SDUI, BFF integration, Modularization, Design Systems, Code Quality, Static Analysis, Performance Optimization.

Exposure

- iOS Development (Swift), Web Development (React) & Backend Development (Node JS)

WORK EXPERIENCE

GRAB, Bangalore

Senior Android Engineer (G4)

NOV 2021 - PRESENT

MAR 2023 - PRESENT

Key Impact: Payments platform features supporting ~\$30M daily TVP, 38% of card additions via NFC, and major reductions in mobile development effort through SDUI and backend-driven UI.

- Migrated Transaction History Details to SDUI, eliminating ~1 week of mobile development per new transaction type across ~50 variants, significantly reducing release cycles.
- Enabled backend-driven Payment Widget on Grab app homepage via BFF APIs, significantly accelerating experimentation and iteration.
- Contributed 13 components (~17%) to the in-house design system, improving UI consistency and development velocity.
- Reduced app size by ~800 KB (0.65%) by removing ~55K lines of legacy code, improving maintainability and performance.
- Established quality standards for Design Library and Payments SDK, including linters, static analysis, architecture guidelines, coding conventions, and binary stability.
- Implemented NFC-based Add Card flow, supporting ~14K daily card additions (~38% of total volume).

Android Engineer (G3)

NOV 2021 - MAR 2023

- Drove early adoption of Jetpack Compose, leading knowledge-sharing sessions and company-wide tech talks to scale adoption.
- Delivered Pay Later functionality for P2M payments, enabling deferred payments at scale and improving transaction flexibility for merchants and users.

Needl.ai, Bangalore

Software Engineer (Mobile)

MAR 2021 - NOV 2021

- Delivered Android & iOS app wrappers using WebView to accelerate time-to-market and enable early user validation.

- Built a unified in-app Notification Center to standardize user communication across the platform.

Tata Consultancy Services (TCS), Kochi
Software Engineer (Android)

JUN 2019 - MAR 2021

Marks & Spencer (M&S)

- Owned end-to-end development of Mobile Pay & Go (MPG), processing ~\$100K daily TPV for ~10K users across hundreds of stores, while driving defect resolution, UI/UX improvements, and feature delivery.
- Optimized core M&S app journeys (Product Listing, Product Detail, Home, Cart), supporting high-traffic customer flows.
- Mentored and onboarded a new team member, accelerating ramp-up through technical and process guidance.

PERSONAL PROJECTS

1. Barcodes - [Google Play Store Link](#)
Android app to scan, generate, and store scanned/generated barcodes.
2. Compose Emoji Picker - github.com/Abhimanyu14/compose-emoji-picker
Android Library to pick an emoji created using Jetpack Compose.
3. Emoji Core - github.com/Abhimanyu14/emoji-core
Kotlin library which provides a list of emojis and related data.
4. Material Symbols - [JetBrains Marketplace](#) ([GitHub](#))
IntelliJ Plugin to download Material Symbols directly from the IDE.
5. [Other Android projects link with APK files and screenshots](#)

EDUCATION

SASTRA University, Thanjavur - B-Tech Computer Science & Engineering (CSE) JUL 2015 - MAY 2019
